

## How Are Cell Phones and Our Testimony Alike?

Our cellphone has a light on it but and we rarely use it to shine into the darkness. How often is our testimony the same?

## When You Experience the Change of Christ in our Lives, You are Different

When we are changed, others see a distinct change in our lives.

When we are changed, the light of Christ should shine in our lives.

## Do You Shine Your Light Before Others?

Is the light that is inside of you like your cell phone light?

You carry it around all the time but never turn it on. You carry it around but never let it shine.

## Light Creates a Path in the Darkness

As the light of the world, we are showing a path in the darkness.

We show a path that leads to Jesus.

Light always penetrates the darkness!

## Light Illuminates the Darkness

When light shines, it exposes the things of the darkness.

## Light Has Healing Properties

When light is applied to our natural bodies, it has the ability to bring healing.

In the same way, when the light of Christ finds its way to our lives, it brings together the pieces of our lives that are broken, shattered and brings everything back together again.
